Education

Ph.D. in Economics , Binghamton University (SUNY)	Expected May 2027
Dissertation: <i>Essays on Digitalization, Productivity, and Markup</i>	
Committee: Subal C. Kumbhakar (chair), Ivan Korolev, Yingjun Su	
M.Sc. in Economics , University of Lagos, Nigeria	2017
B.Sc. in Economics , University of Lagos, Nigeria	2014

Research Interests

Empirical Industrial Organization; Applied Microeconometrics.

Focus: firm productivity, firm and industry dynamics, and structural production-function identification.

Honors and Awards

Best Third-Year Paper Award , Department of Economics, Binghamton University	2025
Graduate Teaching and Research Assistantship, Binghamton University	2022–2027

Publication

Causal Forests versus Penalized Splines for Heterogeneous Treatment Effects

Ivan Korolev, Abiodun Musbaudeen, and Nancy Dhameja. 2026.
Economics Letters 268: 113205. doi:10.1016/j.econlet.2026.113205

Job Market Paper

Digitalization, Factor-Biased Productivity, and Market Power

With Subal C. Kumbhakar.

Separates labor-augmenting and Hicks-neutral productivity and allows for imperfect competition. Spanish manufacturing data for 2000–2019 show positive benchmark associations between digitalization and both productivity components, stronger labor-augmenting gains among small firms, and heterogeneous markup responses under imperfect competition.

Working Papers

The Scale–Technology Paradox: Technological Progress and Productivity Decline in Nigerian Banking

With Subal C. Kumbhakar. **Revise and resubmit**, *Economic Modelling*.

A control-function input distance model for 17 banks over 2000–2023 separates productivity from technical change. Productivity declined by 3.5% annually on average despite cost-reducing technical change and estimated returns to scale of 1.46.

Mediation Analysis in Production Functions with Unobserved Productivity

With Subal C. Kumbhakar. Under review, *Economics Letters*.

Develops a structural framework for direct and input-mediated effects when unobserved productivity confounds treatment, input choice, and output; combines simulation evidence with an application to Spanish manufacturing.

Work in Progress

Regularization in Translog Production Models

Solo-authored.

Evaluates regularization methods by the accuracy and interpretability of production elasticities.

Artificial Intelligence and Spatial Factor-Biased Productivity

With Subal C. Kumbhakar.

Studies how AI adoption changes factor productivity and how effects spread across firms and regions.

Teaching Experience

Department of Economics, Binghamton University (SUNY)

Instructor of Record

Statistical Methods

Summer 2025

Sole responsibility for the syllabus, learning objectives, lectures, problem sets, data exercises, assessments, and grading.

Teaching Assistant

Introduction to Econometrics, Prof. Subal C. Kumbhakar

Fall 2026; Fall 2025

Teach regression foundations, classical assumptions, the Gauss–Markov theorem, hypothesis testing, assumption failures, causal inference, and panel data. Lead R programming, simulation, and reproducible analysis; hold TA sessions and office hours.

Advanced Data Analytics, Prof. Ivan Korolev

Spring 2026

Corporate Economics, Prof. Charles Sebhara

Fall 2024

Principles of Microeconomics, Prof. Amarendra Sharma

Spring 2024

Introduction to Microeconomics, Prof. Wenya Wang

Fall 2023

Macroeconomics, Prof. Kenny Christianson

Spring 2023

Intermediate Microeconomics, Prof. Amarendra Sharma

Fall 2022

Courses Prepared to Teach

Core: Principles and intermediate microeconomics and macroeconomics; statistics; introductory and intermediate econometrics.

Electives: Applied microeconometrics; causal inference and program evaluation; panel data econometrics; productivity and efficiency analysis; data analytics and machine learning for economists.

Educational Resource Development

Learning platform for production and empirical industrial organization (*in development*)

Developing foundational explanations and simulations of production functions, empirical IO, and efficiency analysis.

Presentations

Southern Economic Association Annual Meeting (*scheduled*)

November 2026

North American Productivity Workshop (NAPW)

2025

Professional Experience

Data Engineer and Business Intelligence Analyst, Mindshare (WPP Media), New York

2021–2022

Head of Data Science and Engineering, Konga eCommerce Group, Nigeria

2021

Senior Data Scientist and Data Engineer, First Bank of Nigeria Ltd., Nigeria

2018–2021

Data Research Analyst, West Africa Vocational Education, Nigeria

2018

Computing and Methods

Programming: R, Python, Stata, SQL, $\LaTeX$, Git.

Data and visualization: Snowflake, Oracle, Azure Data Factory, Azure Synapse Analytics, Tableau, Power BI.

Methods: GMM, instrumental variables, control functions, production and distance functions, stochastic frontier analysis, panel data, causal mediation, causal forests, difference-in-differences, synthetic control, regression discontinuity, bootstrap inference, simulation, and regularization.
